PASAR BASAH TANJUNG KARANG			9.00 am - 1.00 pm

reduce

Use less! You don't have to use everything that's given to you. For example, at the mamak shop or even McDonalds, all you need is one tissue. You don't need the 5 or 6 that they give you. Kindly say 'no' and give it back to them, and help to save some trees!

When you want to pack some food at the coffeeshops, **bring your own tupperware or container!** They usually use styrofoam, and this is NOT biodegradable and releases toxic compounds into your food as well!

proper waste management not only **saves MONEY**, but helps combat climate change and preserves our environment for our future generations.

re-use

Instead of throwing things away all the time, think about whether they can be used again for other purposes! A great way to re-use items is to get your children, or even yourself, into nature craft! This means making things out of what we would usually throw away. **A simple tin can could become a beautiful pencil holder** with a little bit of coloured paper or paint, and bits of card and paper can be made into wonderful photoframes. Think about other practical things that 'waste' items can be used for before throwing them away!

each and every one of us can make a difference.

recycle

All sorts of paper, cardboard, plastics, glass, metals, tetrapaks, aluminium cans/tins can be recycled. Don't let them go to waste and help save space in our landfills. You'll also be helping to reduce the amount of greenhouse gases emitted into our atmosphere by reducing the amount of raw materials that need to be processed to make new items.

Little by little, you can help battle climate change and contribute to a greener environment!

compost

Don't let your organic waste stink up your rubbish! Keep your fruit and vegetable peels dry and bury them under some soil! By doing this, you'll be helping to reduce up to 40% of all waste ending up in landfills.

There are other ways to compost too, and they can help decompose other things like leftover meats and other cooked food. So ask for a composting book from GEC today and you'll soon be in the fertilizer business!

rethink

Think before you buy! Don't buy unnecessary items just because it's on sale. Only buy things you know you need and are going to use.

Don't take items just because they're free either. **THINK! Do you really need it? Are you really going to use it?** If the answer is no, kindly decline the offer, and save it from ending up in the rubbish bin.

THINK before you use! Do you really need a plastic bag when it's just one or two items?

close the loop

Help support GREEN products and **buy items made out of recycled materials.** They're pretty hard to find in our local shops and supermarkets in Malaysia, but if we start demanding the supply of such items, companies will pay attention and begin to change their ways too!

If you have the power in your company or organisation to switch to green purchasing, then start using recycled paper today and tell everyone about it!
